

EasySIM®
Learning Experience Platform

An organizational learning platform compatible with contemporary internal and external technologies provides a holistic and comprehensive personalized learning experience and creates a measurable business impact.

EasySIM[®] LXP defines a new paradigm in delivering competency-driven personalized deep learning experience to an organization. This platform is positioned not as a predefined stringent feature rich generic technology product but comes as a strategic solution, service and customizable and configurable platform that can be integrated with all the available internal and externally possible learning feeds to create a holistic and comprehensive continuous adaptive and personalized learning environment.

The platform has been designed using the Design Thinking principles and presents a user-friendly intuitive interface that requires no technical background to design and develop fluidic responsive AI, Multimedia, Multilanguage enabled competency-mapped configurable learning simulations and other learning resources.

Platform Highlights

Highly customizable and configurable learning ecosystem seamlessly integrates with organization's present learning infrastructure

Ability to track, analyze, and report competency-mapped intelligent data reports for any content type, created internally or sourced externally

Deeper and personalized Learning Experience by extending content rendering and consumption from diverse external and internal technological sources

Ability to use most sophisticated configurable multilingual, multimedia-driven competency-mapped programmable simulation, assessment, and learning asset creation interface

Learning Experiences

Training	Scenarios	Micro Learning
Assessments	Simulations	Situational Learning Experiences
Adaptive Learning	Educator Remediation	360 Virtual Walkthroughs
Personalized Learning	Curated Content	Immersive Experience
Personalized Content Curation	Personalized Learning Paths	Video Based Learning Experiences
Candidate Assessment	Legacy Knowledge	Competence Test

Key Features

User Management	Assignment Management	Role Based Workflows and Permissions
Group Management	Training Delivery Management	API based integrations
Content Creation Management	AI Enabled Proctoring	True Responsive Output
Library Management		

Analytics

Leaderboards	Pass/Fail	Content Based Performance Matrix
Decision Promptness	Completion Competencies/ Skills Inventory Attention	Educator Based Performance Matrix
Rankings	Job Readiness	
Score		

What is EasySIM®?

EasySIM® is a Competency driven real job scenario-based Simulated Learning and Assessment Platform, designed to Accelerate Workforce Performance and provide tangible insights into human capital growth against organizations L&D investments.

EasySIM® addresses the diverse organizational learning and performance needs of today and the future.

At the core, the EasySIM® platform can help Define, Design, Create and Manage Organizational Competency Driven Simulated Learning and Assessment Events with an ability to Gather, Process, and Analyze diverse data points to provide deep insights into the present competency and performance state of the workforce as well as design a clear path for growth.

Platform Specifications

Roles	Super Admin	Client Admin	Sub Client Admin	Author	Reviewer	Educator	Learner			
Scenarios	Video Based	Audio Based	Text & Image Based	Text Based	WebObject Based					
Simulations	Linear	Decision Tree based Branching	360 Video	Single Video	Multi Video	Subjective/Open Response				
Offline Authoring Assistance	ES Word Templates									
SME Review	Integrated Author Reviewer Workflow									
Publish Output	Web Object	SCORM	xAPI							
Licensing	Role Based	Seat Based	Sub Domain Based	Space Based	Content Based					
Hosting	Separate DB	Additional Space Provisioning	Micosoft Azure Cloud hosted conforming to ISO 27001, ISO 27018, SOC 1, SOC 2, SOC3, FedRAMP, HITRUST, MTCS, IRAP, and ENS.							
Asset Library	Backgrounds	Characters	Colors	Custom Characters and Backgrounds	Homepage Template	Email Template	Scenario Template	Question Templates		
Database	Separate DB for each unique subdomain									
User Registration	Bulk Upload	Manual	Single Sign on (SSO)							
Analytics	Role Based	Systemwide	Group/Unit/ Location/ Designation	Learner Wise	Competency wise	Job Readiness	Compeletion	Decision Point	Decision Promptness	Attention
Integration with Other Platforms	EasySIM API									
Responsiveness	True Responsive									
Library Management	Available with select plans									
Ai Based User Authentication and Proctoring	Available with select plans									
External Scenarios and Learnings	Import Web objects published using other authoring tools/CMS or LXPs									
Timed Assessment	Decision Promptness Analysis for complete simulation as well as time taken at each decision point									
User Training and Onboarding	Free Virtual Training									
Help desk	Fully Integrated Support workflow with each role									

Role based permissions
